

40 Tips for a Safe & Fun Halloween

Cleverly Careful Costumes

Choose an outfit that won't cause safety hazards:

1. Clothing, accessories, and wigs should all be fire-resistant or flame-retardant.
2. Avoid masks: they may be fun, but they can obstruct vision. Use face paint instead!
3. Use only nontoxic makeup; it's smart to test it first on a small area. And don't forget to remove all traces of makeup before sending kids to bed at the end of the evening.
4. Be sure everyone's shoes fit well and are tied on tightly. No high heels!
5. Keep costumes above knee-height so no one trips or falls, and to help avoid contacting flame or getting tangled up with bushes or other costumes.
6. All accessories (even swords and canes) should be short and flexible, and without any sharp points.
7. Fasten reflective tape or glow-in-the-dark stickers to bags and costumes and/or have kids carry glow sticks or flashlights. Kids can wear glow sticks as bracelets or necklaces, too. When possible, choose costumes with light colors.
8. Put a nametag including your name and phone number on each child's costume.

Walk Wisely

9. Any kids under age 12 should be accompanied and supervised by a parent or responsible adult while trick-or-treating, even in your own neighborhood.
10. Map out your route before leaving the house, and notify loved ones what time you plan to return home.
11. Make sure all adults are carrying flashlights with fresh batteries, and fully charged cell phones.

12. When crossing the street: use traffic signals and crosswalks at corners. Look left, right, then left again while crossing – and keep looking around the whole time during crossing.
13. Put down any electronic devices, keep your head up, and walk (don't run) across the street.
14. It's a good idea to always make eye contact with drivers before crossing in front of their vehicle.
15. Never dart out into the street! Watch for turning cars. Don't assume the right of way. Avoid alleys and don't cut across yards. And never cross the street between parked cars or out of driveways.
16. Walk on direct routes, with the fewest crossings, facing traffic when possible, always staying on sidewalks or clearly marked and well-lit paths.
17. Stay away from candles and other open flames.
18. Only visit homes with their porch lights on. Never enter a home, or a vehicle, for a treat. In general, it's best to stay in your own neighborhood and stick to the homes of people you know.
19. Remind kids about the steps involved in calling 9-1-1 or their local emergency contact.
20. Notify law enforcement authorities immediately of any unlawful or suspicious activity.
21. Remind kids not to eat any treats until they get back home.

Safety Tips for Motorists

22. Drive slowly and stay extra alert on Halloween, especially in residential neighborhoods. Excited children can move quickly and in unpredictable ways. Watch out for kids at medians, curbs, and intersections.
23. When entering or exiting driveways or alleys, drive slowly and carefully.
24. Put away your phone, and allow no distractions. Focus on the road and on your surroundings.
25. Keep headlights on even before sunset to spot children from a distance.

Pumpkin Carving

26. Don't let small children carve pumpkins. Have them draw a face with markers, then have an adult do the carving.
27. Try lighting your pumpkin with a flashlight, LED lantern, or glow stick. If you have to light a candle, votives are safest.
28. Pumpkins lit by candles must always sit on a sturdy surface, away from traffic and from anything flammable.
29. Never leave a candlelit pumpkin unattended.

Home Safe Home

30. Keep your home safe for the trick-or-treaters!
Examine your front porch, steps, walkways, and yard and remove anything that could cause a child to trip or slip and fall, such as bikes, lawn decorations, toys, garden hoses, wet leaves, snow, etc.
31. Make sure the bulbs in all outdoor lights are functional. Ensure that the walkway and front door are visible and brightly lit.
32. Keep all family pets far away from treat-or-treaters. Restrain or temporarily remove pets if necessary.

Healthy Halloween

33. Check every single treat to make sure it is sealed.
34. Dispose of all:
 - Candy with torn packages, holes, or opened wrapping
 - Spoiled items
 - Homemade treats prepared by anyone you don't know
 - Suspicious or questionable items of any kind
35. If your child has any food allergies, inspect candy labels fully. Many Halloween candies contain some of the most common allergens. For any treats without ingredient lists, bag them up and arrange a treat exchange with friends.
36. Don't let young children consume any gum, peanuts, or hard candy, which may risk choking.
37. Be sure kids eat a substantial, healthy dinner before they go out trick-or-treating or attend Halloween parties.
38. Work with children to ration out treats over the days and weeks after Halloween, rather than leaving candy out in bowls or allowing kids to take bags of treats to their bedrooms. One or two treats a day until they're gone is a healthier rate of consumption.
39. If you want to encourage kids to avoid all the extra sugar after the fun of trick-or-treating, ask your children if they might like to swap out some or all of their treats for something else, like a book, a toy, or an outing to a park, restaurant, movie, or museum.

Safety First

40. Remember, going out trick-or-treating isn't the only way to celebrate Halloween! If for any reason you'd like your kids to avoid the dangers of trick-or-treating, all kinds of alternatives ensure your children won't miss out on any of the excitement. Slumber parties, games, candy trades, costume contests with prizes, movie nights: the options are plentiful and increasingly common, so feel free to start fun new traditions in the name of safety.

HAPPY
Halloween
FROM
LEARNING A-Z

The text is decorated with several Halloween-themed icons: three black bats flying around the word 'Halloween', two spiderwebs (one on the left and one on the right), and a small black spider at the bottom right.
